

fieldPRO

“fieldPRO was easy to use and it guided me through the End of Warranty inspection process from start to finish. After the inspections were completed, fieldPRO converted the pictures I took and comments I wrote into a report and sent it to the project manager. I didn’t have to spend time in the evening renaming photos, writing reports, or uploading files.”

Project Deployment & Support Technician
EDF Renewable Services

Collect field data clean first time

Stay in control of field operations at your desk

Mitigate safety risks

Empower field team with O&M expertise in cloud software

Go Digital Without the Pain

Developed by ONYX InSight, fieldPRO™ is a mobile, cloud-based inspection and service tool that maximises the safety and efficiency of turbine and equipment inspections. With ONYX InSight’s engineering expertise built-in, it makes the transition from pen and paper to digital recording easy, opening the door to a fully digitalised O&M approach.

Data is ready to use, no cleaning, out of the box!

- ✗ Collect field data clean 1st time**
Failure mode dropdown menu based on ISO/AGMA standard and ONYX O&M expertise
- ✗ Built in digital models**
Images, failure modes, engineer’s comments are automatically
- ✗ Integrate with other field tools**
Borescope, drone and thermal image cameras

2000+

wind turbines inspected using fieldPRO™

Key Features

Software Features		
Mobile App	Mobile Inspection/Service Checklist	✓
	Offline Mode	✓
	Failure Mode/Comment Database	✓
Web Portal	Report Editing & Approval	✓
	Aggregated Issue Analytics – Gallery, Punchlist, Chart	✓
	External Photo Upload	✓
Advanced Setting & Data Handling	Checklist Editor	✓
	Wind Turbine Model Editor	✓
	Batch Photo Import (For Borescope/Blade Inspection)	✓
	Batch Photo Export to Files*	✓
	User Access Permission Setting per Windfarm*	✓
Customization and Support		
Report template	Customer’s logo	✓
	Customer’s report template	✓
Support	Web-based Training + Technical Support (/Year)	✓
Integration	Integration with customer’s ERP / CMMS system	✓
